Art Unit: 1614

Claims 1-4 are presented for examination.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-4 are indefinite in failing to identify "n" in formula (1).

Claims 1-4 are rejected under 35 U.S.C. 103 as being unpatentable over The Patent Abstract of Japan 10319358 (Menicin CO LTD) and the Patent Abstract of Japan 10108899 (Tomey Technol Corp) for the reasons set forth on pages 2 and 3 of the office action of September 24, 2003.

Applicant's arguments and declaration have been carefully considered, but are not deemed to be persuasive. Applicant alleges criticality to the lower concentrations of the claimed invention and the superior anti-bacterial activity of such concentrations. The allegation is not well taken. The presented data in the declaration demonstrating the superior activity of the claimed lower concentrations are not clear. Such data show the log reduction of >3.04 for the comparative examples 1 and 2 for pseudomonas aeruginosa and 4.16 and 3.86 for Candida Albicans. The log reduction for the claimed composition is >3.57 for Pseudomonas aeruginosa and the log reduction of >3.87 and 1.18 for Candida Albicans. The above data do not demonstrate the superior antibacterial activity of the claimed concentrations for Candida Albicans.

Art Unit: 1614

Furthermore, the superior antibacterial activity for *Pseudomonas aeruginosa* is not well established by the presented examples.

Applicant has presented no evidence to establish the unexpected or unobvious nature of the claimed invention, and as such, claims 1-4 are properly rejected under 35 U.S.C. 103.
